Understanding That Genetics Are Unpredictable

We Strive To Produce Puppies From Quality Breeding Stock. Our Dogs Have Been Ofa Certified In Hips And Heart- Two Of The Worst Possible Scenarios A Newfoundland Can Encounter, (As Well As Testing Cystinuria Clear.) This Does Not Ensure That The Puppy Will Not Develop Heart Or Hip Problems. It Only Ensures That The Breeding Stock Is Sound And We Have Taken Measures To Ensure That Fact For You. As With All Of Nature, The Gene Pool Remains A Mystery Of Sorts And Cannot Be Predicted, At This Time, In Any Way, To Prevent Certain Hereditary Issues From Occurring In A

Pup. Puppies come with a Veterinary check, worming, first shots and structural alignment

I understand and believe that owning a Newfoundland is a commitment for the lifetime of the dog. I certify that the information I have given herein is true and accurate. I am aware that any deposit given is non-refundable and that a phone interview or personal meeting is required prior to leaving a deposit. I Understand The Risk Of The Hereditary Diseases That Run Throughout The Gene Pool Of This Breed, Which The Puppy I May Acquire Could Inherit.
